

JCA WEBINARS FINISHED

Four webinars were carried out in the partners' countries between November 2016 and February 2017. These participatory events included a summary of the project and activities carried out so far (highlighting the pilot implementation in Portugal), a brief overview of the learning tools (Scratch and App Inventor) and basic concepts to support the application of the curriculum guide in the partners' schools, paired with a demonstration. In general, all participants (teachers with ICT background) were satisfied with the webinars and considered the experience good or excellent.

UPCOMING MULTIPLIER EVENT IN GREECE

On 26-29 April, the national multiplier event will take place in Greece, as part of the 7th Student Digital Creation Festival (DIGIFEST). This festival is an educational event that allows students to present digital works developed in their schools. The Regional Directorate of Primary and Secondary Education of Crete will organize a special session in this Festival dedicated to the Junior Code Academy project and main resources, namely the curriculum guide.

You can learn all about this event here www.digifest.info.

3RD PROJECT MEETING ALREADY SCHEDULED

The partners will have their 3rd transnational face-to-face meeting in Bari (Italy) on the 9-10 May. This meeting will be useful to discuss the project's activities so far and analyze the outcomes of the Portuguese pilot implementation, as well as the results of the multiplier event hosted in Greece. Additionally, partners will discuss the progress of the curriculum guide implementation in partners' schools (in Italy and Greece) and fine-tuned next steps of the project, including the organization of multiplier events in all partners' countries.
